Roger that...

Lets see if we can finally pull off this PCC multi region support effort. I asked my PCC's to create code. That way any calls relating to gulf oil can be captured. You might also do the same. In addition, talk to them about sending you an up-date at the end of the day on call volume. Obviously we can help if they get a real sticky call or question (Consult). I have done this for my Louisiana PCC. I have asked EPA R6 if they want to use PCC's more. All we have to due is have the RRT call the NRC and provide the PCC 1-800-222-1222 number to citizens. We are off. CDC-Info may not have the ability to call people back like the PCC can. Just some thoughts. Call my cell if you have questions in the next few days. 214-577-3506. Will be in the office on Thursday, but following crack berry for messages.

ATSDR ASSISTANCE  
Grants, NM

EPA is going to release a document on what they are going to address in the next 5 years on uranium mining activities.
